IDENTIFIERS	*Indiana Vocational Technical College

ABSTRACT

In 1987, the Indiana Commission for Higher Education recommended that the Indiana Vocational Technical College (IVTC) system and other state postsecondary educational institutions work cooperatively to develop associate degree programs designed to articulate with related baccalaureate degree programs. In May 1995, the state undertook an examination of the status of the associate degree programs in terms of the extent of credit transfer from IVTC to other public institutions, the basis of program transfer agreements, the transfer of credits to related bachelor's degrees, and program agreements with independent and out-of-state institutions. Findings included the following: (1) based on the agreements reached on general education courses alone at IVTC (also known as Ivy Tech), virtually every IVTC associate degree program transferred at least some credits to public, four-year institutions; (2) programs transferred a minimum of 6 semester hours of GE credits, while the majority transferred from 9 to 12 semester hours; (3) the two different bases for program transfer agreements were program articulation agreements and course-by-course agreements; (4) 13 independent institutions had at least one program articulation with at least one IVTC campus; and (5) in general, significant progress was found regarding the transfer of IVTC credit to other public institutions, meeting the goals of the 1987 recommendations. Appendixes provide spring 1995 data on IVTC program transfers with state public, independent, nd selected out-of-state institutions, as well as the 1987 recommenda ions. (KP)

COMMISSION FOR HIGHER EDUCATION
Friday, August 11, 1995

DISCUSSION ITEM B: **Ivy Tech Program Transfer Agreements with Four-Year Institutions: A Working Paper**

Staff Recommendation For information only.

Background

The Indiana Commission for Higher Education has statutory authority "to develop, continually keep current, and implement a long range plan for postsecondary education ... [and] to make, or cause to be made, studies of the needs for various types of postsecondary education and to make recommendations to the general assembly and the governor concerning the organization of these programs."

Pursuant to the statutory authorities just cited, the Commission is undertaking a study of two-year instructional and program opportunities in Indiana. This discussion item updates the Commission with respect to the nature and extent of program transfer understandings that Ivy Tech has developed with both public and independent institutions.

This item appeared in the Commission's May 1995 agenda, but there was insufficient time for the Commission to discuss it. No changes have been made to the working paper since it appeared in the May agenda.

Supporting Document *Ivy Tech Program Transfer Agreements with Four-Year Institutions: A Working Paper*, May 3, 1995

Introduction

In December, 1987, the Commission for Higher Education acted upon a "Suggested Framework for Cooperative Improvement for Two-Year Program Opportunities," which invited the institutions to work cooperatively to develop "a limited number of IVTC associate degree programs designed to articulate with related baccalaureate degree programs" (see Appendix C).

More specifically, the document acted upon in December, 1987 included the following suggestions:

> *"That during the 1987-88 period, Indiana Vocational Technical College (IVTC) and cooperating public or private four-year institutions be encouraged to propose a limited number (not to exceed twelve over the next biennium) of strengthened, articulated IVTC programs, and that such programs carry the Associate of Science (A.S.) degree designation ...*
>
> *That IVTC and cooperating four-year institutions be encouraged to maximize the number of technical courses in an upgraded associate degree program to be transferred to a related baccalaureate level technology program ..."*

Pursuant to these suggestions, Ivy Tech has developed a number of program transfer agreements with four-year institutions that are designed to maximize the number of Ivy Tech associate degree credits transferring to and counting towards a related baccalaureate degree program.

As part of the Commission for Higher Education's analysis of two-year program opportunities in Indiana, the Commission requested Ivy Tech to identify the program transfer understandings with four-year institutions that are currently in force (see Appendix A). This agenda item summarizes and analyzes the documentation provided by Ivy Tech.

It should be noted that Ivy Tech has reported information only on those associate degree programs for which a written agreement with a four-year institution exists.

Extent of Credit Transfer to Public Institutions

For purposes of this analysis, the percentage of credits transferring is calculated by Ivy Tech using the total number of credits, including general education credits, required by the College to complete the degree. For example, a program reported by the College as transferring 50 percent of its credits means that 30 semester hours of a 60-hour associate degree will transfer.

By virtue of the 1992 legislative mandate to transfer 30 semester hours of general education transfer of credit, virtually all Ivy Tech associate degree programs -- not only Associate in Science (A.S.) but also Associate in Applied Science (A.A.S.) programs -- transfer at least six hours or ten percent of the total number of credit hours required for the associate degree. This is so because every associate degree program at Ivy Tech contains at least six hours of general education credit that is included in the 30-semester hour core agreement, and hence transfers among all public institutions.

In actuality, the majority of Ivy Tech associate degree programs contain at least 12 semester hours of general education credit that is included among the 30-hour core mandated by the state, and thus the majority of Ivy Tech programs transfer at least 20 percent of their credits to four-year, public institutions.

For institutions that have developed transfer agreements with Ivy Tech for general education courses beyond the 30-hour core, such as Purdue University, the majority of Ivy Tech associate degree programs may transfer 30 percent or more of their credits on the basis of general education courses alone.

The specific program transfer understandings identified in this report only include those programs that transfer 50 percent or more of their credits, which means that at least some technical courses required to complete the associate degree programs transfer in addition to general education courses.

Ivy Tech reports that associate degrees in each of eleven program areas transfer credits to at least one public campus (see Table 1).

Nursing programs at Ivy Tech transfer credits to eight campuses -- more than any other program area. It is also notable that all, or almost all, of the ASN credits transfer to BSN programs in seven of the eight campuses. The Computer Information Systems program at Ivy Tech transfers credits to four public university campuses.

Ivy Tech associate degree programs in Business Administration, Electronics Technology, Hospitality Administration, and Visual Communications have program transfer agreements with two public campuses each. Associate degree programs in five other areas -- Design Technology, Manufacturing Technology, Occupational Therapy Assisting, Radiologic Technology, and Respiratory Care -- each have one public campus with which a program transfer agreement has been reached.

The IUPUI campus has six program transfer agreements with Ivy Tech that result in 50 percent or more of the Ivy Tech credits transferring, and Purdue-Calumet has five such agreements (see Table 2). Indiana University Northwest and the University of Southern Indiana each have three program transfer agreements with Ivy Tech, and IU South Bend and Indiana State have two each.

Table 1

EXTENT TO WHICH IVY TECH PROGRAMS TRANSFER
50 PERCENT OR MORE CREDITS TO PUBLIC FOUR-YEAR INSTITUTIONS

Ivy Tech Associate Degree Programs	75-100 Percent of Credits Transfer	50-74 Percent of Credits Transfer
Business Administration		IU Northwest Purdue-Calumet
Computer Information Systems	IU Northwest Purdue-Calumet USI	IUPUI
Design Technology		Purdue-Calumet
Electronics Technology		Purdue-Calumet ISU
Hospitality Administration		IUPUI Purdue-Calumet
Manufacturing Technology		ISU
Nursing	IU East IU Kokomo IU Northwest IU South Bend IU Southeast IUPUI USI	BSU
Occupational Therapy Assisting	IUPUI	
Radiologic Technology	IUPUI	
Respiratory Care	IUPUI	
Visual Communications	IU South Bend USI	

Table 2

NUMBER OF PROGRAM TRANSFER AGREEMENTS
WITH PUBLIC FOUR-YEAR INSTITUTIONS
THAT TRANSFER 50 PERCENT OR MORE IVY TECH CREDITS

Four-Year Campus	Number of Program Transfer Agreements with Ivy Tech
IUPUI	6
Purdue-Calumet	5
IU Northwest	3
USI	3
IU South Bend	2
Indiana State	2
IU East	1
IU Kokomo	1
IU Southeast	1
Ball State	1
IU Bloomington	0
Purdue-West Lafayette	0
Purdue-North Central	0
IPFW	0

All other public campuses either have one program transfer agreement (IU East, IU Kokomo, IU Southeast, and Ball State) or none (IU Bloomington, Purdue-West Lafayette, Purdue-North Central, and IPFW).

Basis of the Program Transfer Agreements

Ivy Tech has indicated that there are two different bases for program transfer agreements: program articulation agreements and course-by-course agreements.

Program articulation agreements assume that the student has completed a particular associate degree program. On the basis of a written agreement concluded between Ivy Tech and the four-year institution following a joint faculty review of the Ivy Tech program curriculum, a graduate of the Ivy Tech program can expect that a certain amount of credit hours, as specified in the agreement, will transfer toward a given baccalaureate degree program.

Course-by-course agreements are not formulated in the context of a program articulation agreement. Rather, the agreements are based on a joint faculty review of related course syllabi at Ivy Tech and the four-year institution. With one or two exceptions, the agreements apply irrespective of whether or not the student has completed an Ivy Tech associate degree. For purposes of responding to the Commission's request, Ivy Tech has identified those course-by-course agreements that significantly cluster in an associate degree and a related baccalaureate discipline or program area, and has reported the cluster as a program transfer understanding.

Two public campuses have program transfer agreements with Ivy Tech that are based on course-by-course agreements instead of program articulation agreements:

Purdue University-Calumet
Ball State University

Three public campuses have program transfer agreements with Ivy Tech that are based on program articulation agreements as well as course-by-course agreements:

IUPUI
Indiana University Northwest
Indiana State University

Two public campuses and the Indiana University School of Nursing have program transfer agreements with Ivy Tech that are based on program articulation agreements:

Indiana University South Bend
Indiana University School of Nursing
University of Southern Indiana

Since the Indiana University School of Nursing is a systemwide school and is considered a single entity for purposes of accreditation and curriculum development, the program articulation agreement with the College means that a graduate of an Ivy Tech A.S. in Nursing (ASN) program is able to transfer all, or almost all, of their ASN credits into the B.S. in Nursing (BSN) offered at any IU campus.

Transfer to a Related Degree

Associate degree credit hours reported by Ivy Tech as transferring into a baccalaureate degree are understood to transfer into a four-year degree in a related -- often closely related -- program area. For example, the Ivy Tech credits earned in an A.S. in Nursing degree are understood to transfer into, and count towards, a B.S. in Nursing degree.

However, in the case of some program transfer agreements with pubic institutions, the relatedness of the baccalaureate degree to the associate degree may not be as close as the relationship between associate degree and baccalaureate degree nursing programs. For example,

- The technical coursework in all Ivy Tech associate degrees will count toward meeting the requirements for the Bachelor of Occupational and General Studies offered by the University of Southern Indiana

- All Ivy Tech allied health associate degrees will articulate with the B.S.Ed. in Health Sciences Education offered by Indiana University at its IUPUI campus

For purposes of this analysis, the IUPUI Health Sciences Education and the USI Occupational and General Studies baccalaureate degrees have not been included in the tabulation of program transfer agreements.

Similarly, in the case of some articulation agreements with independent institutions, two or more Ivy Tech associate degree programs are understood to transfer into a single baccalaureate degree, whose relationship to some associate degrees may be closer than to others. For example,

- Ivy Tech associate degrees in Public Safety and four technology areas (Automotive, Design, Electronics, and Manufacturing) will transfer into the B.S. in Management of Technical Operations at Embry-Riddle Aeronautical University

- All Ivy Tech associate degrees will transfer into the B.S. in Business Administration offered by Indiana Wesleyan University

Program Transfer Agreements with Indiana Independent Institutions

Ivy Tech has developed a significant number of program transfer agreements with independent institutions, which include transfer of technical credits as well as general education credits (see Appendix B). More specifically, 13 Indiana independent institutions each have at least one program articulation with at least one Ivy Tech campus (see Table 3).

Table 3

INDIANA INDEPENDENT INSTITUTIONS WITH AT LEAST ONE PROGRAM TRANSFER AGREEMENT WITH IVY TECH

Anderson University
Calumet College
Embry Riddle Aeronautical University
Goshen College
Indiana Institute of Technology
Indiana Wesleyan University
Martin University
Oakland City College
St. Joseph's College
St. Mary-of-the-Woods
Taylor University
Tri-State University
University of Indianapolis

Program Transfer Agreements with Out-of-State Institutions

The catalog of program transfer agreements developed by Ivy Tech includes agreements reached with a number of out-of-state institutions (see Appendix B). For example,

- Ivy Tech-Gary has developed program articulations with Robert Morris College, an independent institution in Chicago, Illinois

- Ivy Tech has articulated programs at all campuses with Ferris State University, a public institution in Big Rapids, Michigan, which is over 100 miles north-northeast of South Bend.

Conclusions

1. Based on the agreements reached on general education courses alone at Ivy Tech, virtually every Ivy Tech associate degree program transfers at least some credits to public, four-year institutions. More specifically,

   a) Virtually every Ivy Tech associate degree program (A.A.S. and A.S.) transfers a minimum of six semester hours of general education credits, or ten percent of the credits, assuming 60 semester hours for the associate degree;

   b) The majority of Ivy Tech associate degree programs (A.A.S. and A.S.) transfer from 9-12 semester hours or 15-20 percent of all credits to public four-year institutions; and

   c) Some public campuses will transfer up to 18-24 semester hours of general education credits, or 30-40 percent of all credits required for an associate degree, depending upon the program area and whether the program is an A.A.S. program, which has 18 general education credits, or an A.S. program, which has 24 hours of general education.

2. The minimal goals stated in the 1987 "Suggested Framework for Cooperative Improvement for Two-Year Program Opportunities" regarding transfer of Ivy Tech credit for the 1987-89 Biennium have been met.

3. Relatively few agreements with public institutions have been reached thus far regarding the transfer of technical courses or courses required for the associate degree major, and thus relatively few program transfer agreements result in 50 percent of more of the credits transferring.

APPENDIX C

SUGGESTED FRAMEWORK FOR COOPERATIVE IMPROVEMENT FOR TWO-YEAR PROGRAM OPPORTUNITIES

November 30, 1987

Commission for Higher Education

SUGGESTED FRAMEWORK FOR COOPERATIVE IMPROVEMENT
FOR TWO-YEAR PROGRAM OPPORTUNITIES
November 30, 1987

The suggestions contained in this document have been designed to assist institutions in establishing cooperative two-year program opportunities. Institutional representatives involved in developing, reviewing, and/or modifying these suggestions include the following: John Huie (Purdue University); Bill Kramer (Indiana Vocational Technical College); Bill Osmon (Indiana State University); Judy Palmer (Indiana University); Tad Perry (Ball State University); and, John Schmeling (Vincennes University).

A. With regard to program and site selection and approval:

1. That during the 1987-88 period, Indiana Vocational Technical College (IVTC) and cooperating public or private four-year institutions be encouraged to propose a limited number (not to exceed twelve over the next biennium) of strengthened, articulated IVTC programs, and that such programs carry the Associate of Science (A.S.) degree designation (except for programs articulating with Purdue University, which will carry the Associate of Applied Science [A.A.S.] degree designation).

2. That such associate degree programs at IVTC be encouraged to have a substantially common curriculum where a particular program is offered at different sites.

3. That such criteria as size of population, program approval and funding status, and number of transfer opportunities, guide IVTC and cooperating four-year institutions in the choice and number of programs to be submitted for approval for implementation at the various instructional centers during the 1988-89 academic year.

4. That for each program area and for each site for which any given upgraded associate degree program is proposed, IVTC submit to the Commission a regular new program proposal, which contains all standard required information -- with special emphasis placed on the following components:

   a. Supporting documentation for at least one related, articulated baccalaureate program easily accessible to graduates of the instructional center's proposed upgraded associate degree.

   b. The source and delivery mechanism of the general education component of the upgraded associate degree program.

   c. The human, physical, and fiscal resources the College will allocate (new), or reallocate (existing) to the proposed program.

d. Supporting documentation for the need for the upgraded associate degree program at the site proposed.

B. With regard to program quality:

1. That the overall goal of this offering of strengthened associate degree programs at IVTC be the delivery of rigorous technical and general education courses to adequately prepared students by faculty members holding appropriate credentials for the level and substance of the program.

2. That in offering the upgraded associate degree programs, IVTC and the cooperating four-year institutions be encouraged to have as a more specific goal the achievement of standard, program quality indicators, such as those in the following examples:

   a. the majority of upgraded associate degree program technical courses taught by full-time faculty (versus part-time faculty);

   b. faculty members teaching in upgraded associate degree programs holding, at a minimum, the master's degree in a related discipline or other appropriate credentials for the level and substance of the program;

   c. the teaching load for faculty in upgraded associate degree programs ranging up to fifteen credit hours a quarter (twelve for program chairpersons); and,

   d. diagnostic assessment used to document that students have met the criteria for the application of credit to the articulated B.S. program.

C. With regard to the general education component in upgraded associate degree programs:

["General education" is that portion of a student's program which addresses his or her life as a responsible citizen and human being. From the general education component of an upgraded associate degree program the student is expected to increase his or her ability to write and speak clearly and correctly, to acquire a basic understanding of the nature and role of mathematics and science in the modern world, to develop mature social and historical perspectives, and to cultivate a meaningful appreciation for the humanities, literature, and the arts.]

1. That the general education courses for students pursuing the proposed upgraded associate degree programs at IVTC be delivered by one or more four-year institutions with whom IVTC has an articulation agreement for one or more upgraded programs (such four-year institutions being accredited by the North Central Association of Colleges and Schools).

2. That whenever the four-year institution with whom IVTC has an articulation agreement in place cannot provide specific general education courses, a consortium of interested universities make these courses available to IVTC students by means of a statewide, telecommunication delivery system.

3. That IVTC be encouraged to continue providing the general education courses for students not pursing an upgraded associate degree program at IVTC, with students in such programs having the option of selecting and applying toward their degree or certificate the general education courses provided by the four-year institution.

4. That duplication of effort be minimized in the delivery of general education courses (by IVTC and four-year institutions and among four-year institutions).

5. That the entry requirements of the university general education course continue to apply to all students enrolled in such courses.

D. <u>With regard to program coordination and articulation:</u>

1. That during the fall of 1987, IVTC be encouraged to begin working with various four-year institutions to develop articulation agreements which will describe

   a. the proposed upgraded associate degree programs at IVTC and related baccalaureate programs at the four-year institution, and

   b. the delivery of general education courses by the four-year institution to students in the proposed upgraded associate degree programs.

2. That four-year institutions with whom IVTC has begun articulation discussions be encouraged to coordinate the creation and operation of joint discipline area committees, the purpose being to work toward agreements for the most effective articulation for the upgraded associate degree programs -- such committees to be composed of faculty members from both relevant four-year institutions and IVTC.

3. That IVTC and cooperating four-year institutions be encouraged to maximize the number of technical courses in an upgraded associate degree program to be transferred to a related baccalaureate level technology program, by one or more of the following methods:

   a. through identifying similar content and student competencies between the upgraded associate degree program technical courses and the university baccalaureate degree technical courses;

   b. by students' demonstrating proficiency either through testing administered by the institution accepting credit or through acceptable performance in advanced courses (with students' receiving credit for lover level courses not taken); and/or

c. through strengthening or modifying the upgraded associate degree program technical courses at IVTC so that they may qualify for transfer.

4. That during the transition period, IVTC and cooperating four-year institutions be encouraged to develop an appropriately monitored conversion process for students who originally enrolled in an regular IVTC associate degree program but who wish to change to an upgraded IVTC associate degree program.
